About

Hello, I'm Stu, an experienced software developer based in Stockton-on-Tees. With 15+ years of experience acquired through employment and freelance projects, I excel in developing and delivering diverse software projects.

I am open to collaboration, contract and freelance opportunities. Let's connect and explore how we can create something extraordinary together.

Core Skillset

01
Backend Dev

Proficient in designing, building, and maintaining robust server-side applications and APIs.

PHP, Go, Python.

02
Frontend Dev

Skilled in creating responsive interfaces across various devices and platforms.

JS, React, React Native, Vue, TS.

03
Frameworks

Expertise in a variety of frameworks tailored to project-specific requirements.

Laravel, Magento, Shopify, Wordpress.

04
Data

Experienced in handling and analysing large datasets, implementing data storage solutions.

**MySQL, MongoDB, ElasticSearch, MariaDB.**

05
Methodologies

Well-versed in agile and other development methodologies, promoting iterative development, continuous integration, and collaborative teamwork for delivering high-quality software solutions.

06
Problem Solver

I excel in dissecting complex issues, identifying root causes, and formulating effective solutions that address both immediate concerns and long-term objectives.

01 Brief

Understanding your objectives, requirements, and desired outcomes.

02 Quote

Outline the estimated costs, timelines, and any resources required to complete the project

03 Offer

A finalised project plan, terms of engagement, and a clear outline of deliverables

Projects

Contract work

Initial Chat

We'll start with a brief conversation to understand your project needs, goals, and expectations. This helps us align on the scope of work and determine if we're a good fit for collaboration.

Tech Test

After our initial chat, I will be available to undertake a technical test to demonstrate my skills and suitability for your project.
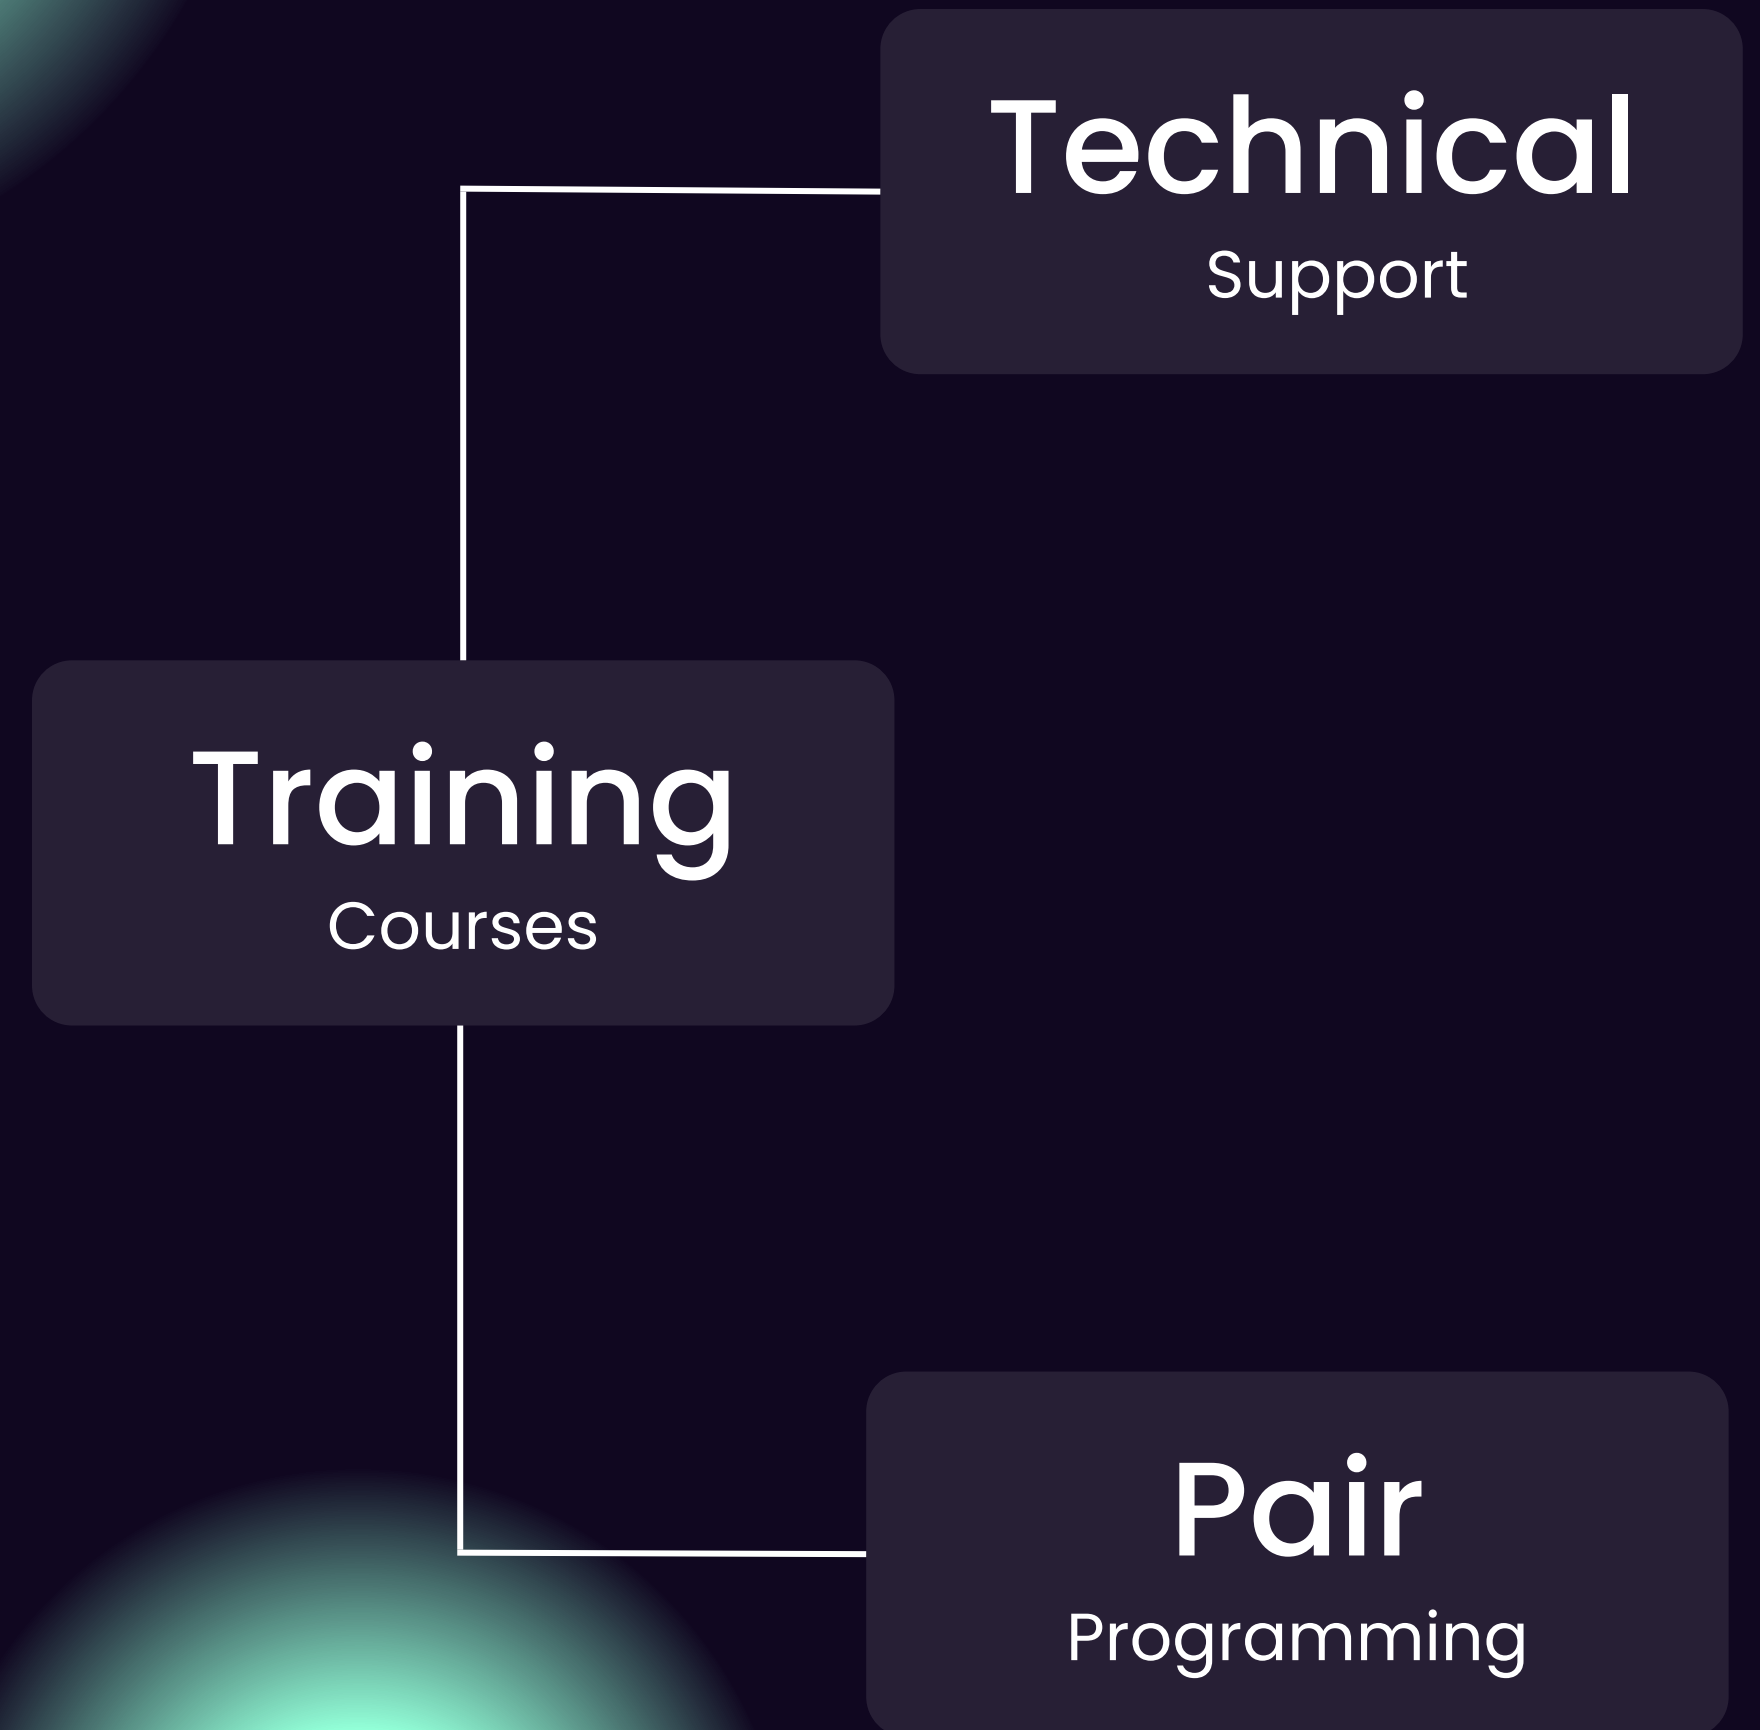

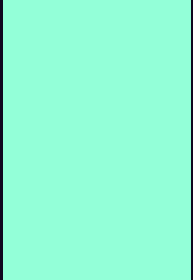

Offer

We'll discuss the terms of the contract. Once we agree on the details, I will present a formal offer outlining the scope, timeline, and compensation for the work.

Collaboration

Collaborating with businesses opens up a wealth of opportunities, especially in the dynamic startup scene.

Whether it's training staff, pair programming on a project, or providing full-time tech support in exchange for a share of your startup, I am available to help you leverage these opportunities.
